1. Check the scale of your size guide.

2. Fold the paper following the bold lines and place the fold against the wall.

3. Place your strongest foot on it, it must sit flat with the heel against the wall, slightly bend your knee (as if you were on your skis).

4. Draw a mark in front of your longest toe and get your Mondo-point size. To make things easier and more precise, ask a friend for help.

Check Glisshop size recommendations on every boot descriptions.
